

Marine Line

Overview of KENYU floor covering

The KENYU flooring material has an anti-slip surface. It is a new convenient and safe solution for boat floors applied after sale and is an alternative to customary floors for decks.

The KENYU material consists of a close-porous EVA-foam that is UV-resistant (3000h).

Additionally, KENYU is equipped with a self-adhesive 3M™ glue based on acrylic and it offers the highest adhesion even under water.

Characteristics of a KENYU flooring material:

- anti-slip surface
- high comfort when sitting, standing and walking on it
- shock-absorption and noise-reduction
- self-adhesive
- UV-resistant
- grip, even if wet
- extremely light
- insensitive to temperatures (it does not heat up a lot)
- easy to clean
- a wide variety of color and combinations
- individual adaptation and design

KENYU flooring material care instructions:

- remove excessive dirt immediately
- vacuum or brush off
- rinse off with a lot of clean water

Things that can harm KENYU flooring material:

- hard and sharp objects
- excessive pressure (high-pressure cleaners)
- max. temperatures of above 70° centigrade
- strong cleaning agents
- sun reflections (melting)
